DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 2, 161, 162. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities:

The specification is missing proper sectional headings

Page 2, line 26:

There is no Figure 4

The specification makes multiple references to specific claim numbers, which is improper. Claim numbers can change during prosecution, and claims can be cancelled. As such, Applicant should avoid citing specific claim numbers, and instead insert that which is specifically taught in the claims, in the specification.

Appropriate correction is required.

Application/Control Number: 10/684,216 Page 3

Art Unit: 3765

Claim Objections

3. Claim 22 is objected to because of the following informalities: "insert form" reads poorly. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 16, 17, 20-26, 31, and 32 are rejected under 35 U.S.C. 102(b) as being anticipated by Wassenhoven et al (5398494).

Wassenhoven teaches a disintegrator roll housing (Abstract) comprising side walls forming two sides of the housing, a circumferential wall disposed between the side walls (inherent of housing since it must encase a disintegrator roll), said circumferential wall forming at least one side of a feed opening and forming an exit opening (Figure 3), and an exchangeable insert having at least one fastener and being positioned between the sidewalls and after said feed opening in a direction of rotation of a disintegrating roll (23), said insert acting as a portion of the circumferential wall and at least partially forming a contaminant separation opening, wherein the circumferential wall includes an abutment to rest against the insert (Figure 3 where insert rests against wall 7). Further, the insert comprises two projections having rounded edges disposed parallel to each other in a fork shape forming the contaminant separation opening (Walls of 23 and floor form a U shape, which is forked shape, which form a tunnel for

Art Unit: 3765

contaminant separation), and is capable of supporting a fiber band (as best understood, since detail 162 is not in the figures)

In regards to a procedure of renovating a disintegrating apparatus, such would be inherent of Wassenhoven since by introducing his insert, he inherently took the prior art, removed a segment of a circumferential wall including at least a portion of the circumferential wall defining a contaminant separation opening, since such a device was the prior art of the time of invention.

Allowable Subject Matter

6. Claims 18, 19, and 27-30 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

- 7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Artzt et al (4700431) and Stahlecker (3975895) each teach what is well known in the art.
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shaun R Hurley whose telephone number is (703) 605-1236. The examiner can normally be reached on Mon Fri, 6:30am 3:00pm, off every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John J Calvert can be reached on (703) 305-1025. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
